Dear Mr Mason

I thought I would drop you a line to thank you for fabricating and installing our electrically operated steel gates.

These gates have exceeded our expectations in every way. These were made and installed exactly as arranged. The quality, robustness and bespoke nature of your workmanship are truly exceptional and for a reasonable price given your care and attention to detail, which reflects the many years of experience you have in the industry. We are delighted with the smooth operation of the BFT electric controllers.

I would not hesitate to recommend you and your products and indeed I already have done so.

Yours sincerely

K J W
